I am a 5th-year student in the Computer Engineering program, specializing in software engineering. I am currently seeking a 6-month end-of-studies internship. I have gained practical experience through internships and academic projects while nurturing my passion for technological innovation.

🎓 ACADEMIC JOURNEY

Cycle d'ingénieur en informatique,   2019 – present
Ecole Supérieure Privée d'Ingénierie et de Technologies – ESPRIT

🧠 TECHNICAL SKILLS

Languages
Java,JavaScript,HTML,CSS,C#,C++,C,PHP,TypeScript

Frameworks
Symphony,Angluar, ASP.NET
CORE,SpringBoot,Bootstrap,javaFx,Codename One

Code management
Github,Jenkins

Operating systems
Windows,Ubuntu

WebServices
REST,SOAP

Concepts
UML

Methodologies
Agile:scrum,DevOps

Management tool
Trello

💼 PROFESSIONAL EXPERIENCES

Engineering Internship,   07/2023 – 09/2023
Clinique internationale (agence de tourisme médicale)
Web Application for Employee and Human Resources Management.

Features: Employee management, Leave management, Follow-up visits management, Account management with Login and Logout, Role management, Dynamic authorization management.

Internship Achievements:

Requirements specification | Backlog planning | Sprint planning | Design and modeling for each Sprint | Development and Testing | Active participation in daily Stand-Up meetings | Sprint retrospective | Project delivery.

Technologies: C#, ASP.NET Core, ASP.NET Identity, cshtml, CSS, JavaScript, Microsoft SQL Server.

Methodology: Agile: Scrum."

Company Immersion Internship, *Electro Tounes*   07/2022 – 08/2022
Internship Achievements:

Development of a new modern graphical interface using
CSS/HTML/JavaScript
Integration of an online payment module
SEO optimization
Methodology: Agile: Scrum.

🗁 ACADEMIC PROJECTS

Projet DevOps   09/2023 – 11/2023

Creation of a continuous integration pipeline | Development of virtualized application containers | Construction of a dashboard.
Technologies: Jenkins, Docker, Vagrant, DockerCompose, Github.

Projet IMMOBI-TEC   01/2023 – 05/2023
Design and development of a real estate web application.

The application was selected as one of the top 8 out of 50 projects at the project ball.

Description:

This application provides users with the ability to buy land and apartments, auction their properties, browse an online store for personal needs, find dormitories for student rentals, and benefit from professional legal services.

Achievements:

Requirements specification | Design and modeling | Back-end development | Front-end development | Data preparation | Creation of models based on data | Scoring.

Technologies: Spring Boot, Java, Angular, TypeScript, HTML, CSS, MySQL, Python.

Projet Quantech   01/2022 – 05/2022
Design and development of a cross-platform application (mobile, web, desktop).

Description:

A cross-platform application that essentially functions as an e-commerce site.

Achievements:

Requirements specification | Backlog planning | Sprint planning | Design and modeling for each Sprint | Development and Testing of a desktop application | Development and Testing of a web application | Development and Testing of a mobile application | Integration of the three applications on a common database | Project delivery.

Technologies: Java, JavaFX, Symphony, CodeNameOne, MySQL.

Methodology: Agile: Scrum.
